Garrett Bainwol

has successfully completed the online, non-credit Specialization

Finance for Technical Managers

Learners develop a foundational understanding of financial principles and the practical skills necessary to be a successful technical manager in industry. They explore types of costs and how they apply to establish a product cost. Learners acquire the knowledge to conduct a discounted cash flow analysis, enabling them to determine the economic value of a project using metrics common in business today. Learners then apply these tools to their own personal finances by creating a long-term investment plan using stocks, bonds, and mutual funds. The specialization culminates in learners interpreting a company's annual financial statements and sustainability reports as indicators of financial health and progress towards environmental, social, and corporate governance objectives (ESG).

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
